COVID-19 and Down Syndrome: Vaccine Response

More needs to be learned about COVID-19 and the related vaccine among people with Down syndrome.

You are invited to complete this survey if you are a caregiver of a person with Down syndrome who has received the COVID-19 vaccine or who is eligible but does not plan to receive the vaccine.

The on-line survey:
• takes about 15-30 minutes to complete
• responses cannot be linked back to you (anonymous)
• questions ask about the person’s health, COVID-19, and responses to the vaccine
