

# We're looking for young adults with intellectual or developmental disabilities to participate in our reading study

## Eligibility

### Age

18-26 years old

### Diagnosis

Intellectual and/or developmental disability

### Reading

Reads words & sentences independently, but needs help understanding or engaging in daily reading such as text messages

### Language

English is primary language and primarily uses oral communication

## About the Nationwide Study

The Language Impairment and Down Syndrome research lab at Baylor University would like to learn more about how to best support reading in young adults with intellectual and developmental disabilities.

Everyone who participates will receive some or all of the following: therapy/tutoring, compensation, virtual reading assessments every 3-6 months, and summaries of your reading growth.

## For Participants

Learn how to improve your reading skills

Complete study activities via Zoom at a time that is convenient for you

Receive up to \$225 for your time over the 9-month study
