

Are you or someone you know an adult with Down Syndrome?

ABC-DS
Alzheimer Biomarker Consortium-Down Syndrome

The ABC-DS study aims to better understand the connections between Down syndrome and Alzheimer's disease.

Is this study right for you?

- People with Down syndrome
- 25 years of age or older
- Must be accompanied by a Study Partner (e.g. parent, caregiver, legal guardian)

What does this study involve?

- Visits to one of our research sites to complete puzzles and games, taking pictures of your brain, taking blood and a general physical examination
- Study Partner will complete questionnaires at each visit

What do I gain from this study?

- Participants will be compensated for their travel expenses and time
- Help others better understand brain aging and Down syndrome

Where are the sites?

United States

United Kingdom
